About

What's so engaging about Gravel? Is it the search for variety or the desire to leave the often hectic city behind? Is it the wonderful sound of crunching stones under the tires? Or maybe it's just the unbeatable sense of adventure? However you define gravel for yourself: our new Veto (in Latin as much as "I forbid") forbids nothing: no forest path, no gravel road, no adventure. Endless riding fun thanks to wide, high-grip tires as well as the high-quality carbon frame, maximized stiffness, pleasant seating comfort and many practical attachments make the Veto a partner for the greatest adventures.

About

Maximum riding fun paired with absolute suitability for everyday use: these are the highlights of our new Veto VETO B983. The optimised geometry makes the bike incredibly agile and at the same time very smooth. At the same time, it offers not only very high stiffness in the bottom bracket and headset area, but also a very high level of comfort thanks to its sophisticated construction and fibre covering. The ultra-modern frameset made of T800 carbon fibres features completely internally routed shift cables and brake lines, resulting in an absolutely tidy and extremely sporty look. The fully integrated engage carbon cockpit consists of a separate stem and handlebar, making it easier to adapt the cockpit to all needs. The handlebar has an ergonomic, slightly oval top bar with 125 mm drop. The round carbon seatpost with a diameter of 27.2 mm is designed for high comfort.
